# About Us

MarinePALS, the future of training, is focused on applying digital technology to maritime education and bringing measurable effectiveness in training for seafarers.

## Our Ethos

- Prevention of accidents through byte-sized training.
- Innovation in learning methods using digital technology.
- Focused, concise and precise training content.
- Emphasis on proficiency and competence development.
- Fostering a culture of continuous learning and improvement.

## Our Offerings

**MarineFlix** is a categorized library of micro-learning educational videos meant for seafarers of all ranks, vessel managers, port state inspectors and surveyors.

**Marine Games** are our Gamified learning solutions to make learning enjoyable and competitive.

**Marine VR** our Virtual Reality programs provide several walkthroughs and immersive courses to keep pace with the shift in the learner's preferences for acquiring knowledge.

**Marine Mentors** is our mentoring solution to connect seafarers to mentors within the organisation and with accomplished shore staff from outside world.

**Cadets** is our offering of Digital Record Books of ICS and GlobalMET training record books. Learning content is provided for each competency required to be learnt by the trainee.

**CMS** module covers the requirements of Intertanko and OCIMF Guidelines on Competency Assessment and Verification.

**Assessment system** module is a platform for online assessment to aid in recruitment process and training examinations.

**Survey** module allows for the conduct of online surveys and take the opinions of the workforce in real-time.

**SMS** Manuals are hosted to provide access from mobile devices for quick and ready reference. Pre-joining briefings are hosted digitally, from anywhere.

**Circulars** module allows the delivery directly to the seafarer's mobile devices and allows the tracking of views by individuals.

We also specialize in curating customized company specific training content such as accident reconstruction animation and videos.
