

# marine PALS<sup>®</sup>

The Future of Training

## MARINE FLIX

Micro-learning content and connect with seafarers

## MARINE GAMES

Gamified learning

## MARINE VR

Immersive and engaging learning

## MARINE MENTORS

Structured mentoring and guidance from experienced professionals

## CADETS DIGITAL RECORD BOOKS

Approved digital record books (ICS and GlobalMET) for maritime cadets

## SMS MANUALS & BRIEFINGS

SMS manuals and online briefings to ensure safe and secure operations onboard

## SURVEY

Online survey to gather feedback and improve efficiency

## CIRCULARS

Easy access to circulars from anywhere. Track viewing analytics

# About Us

MarinePALS, the future of training, is focused on applying digital technology to maritime education and bringing measurable effectiveness in training for seafarers.

## Our Ethos

- Prevention of accidents through bite-sized training
- Innovation in learning methods using digital technology
- Focused, concise and precise training content
- Emphasis on proficiency and competence development
- Fostering a culture of continuous learning

## Our Offerings

MarineFlix is a categorized library of short educational videos meant for seafarers of all ranks, vessel managers, port state inspectors and surveyors.

Gamified learning solutions are one of our key offerings to make learning enjoyable and competitive.

Virtual Reality Learning Management System provides several walkthroughs and immersive courses to keep pace with the shift in the learner's preferences for acquiring knowledge.

CADETS is an approved training system based on ICS and GlobalMET training record books. It replicates deck and engine cadet training record books, which have also been approved by Indian Maritime University (IMU) and Directorate General of Shipping, Government of India. It has detailed learning content for each task in the record book.

MENTORS is our mentoring solution for seafarers to encourage the engagement between ship and shore staff.

SMS Manuals are available for ready reference and pre-joining briefings are done digitally, from anywhere.

The provision for online surveys enables continuous improvement by taking views of the stakeholders.

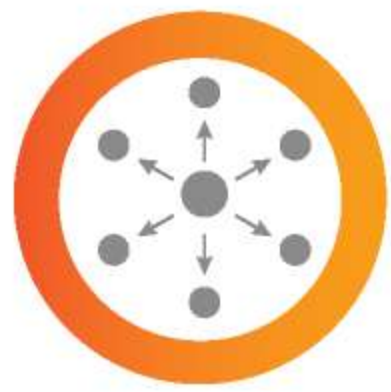

The real-time distribution of circulars keeps all stakeholders up to date and allows tracking of views by individual.

We also make customized company specific training content such as accident reconstruction animation and videos.

# Key Features

## Microlearning Content

Compact learning modules designed for today's and future seafarers.

## Mentors

Instant connect through our mentoring program.

## Encourage Learning Mindset

Gamified experience and rewards promote continuous learning and career growth.

## Personalized Training

Role based training modules based on ship type and user rank.

## Self-Paced Learning

Trainees can learn anytime, anywhere at their own pace. They can revisit modules, if required.

## Tutorials and Assessments

Extensive library of tutorials and assessments.

## Online Learning Dashboard

Training officer can monitor the learning progress of all individuals. The leader board shows the top learners.

## Safe Operation Onboard

Structured shipboard safety familiarization, training and gaming modules to enhance safe working operations onboard.

## Experience the Demo

- Go to the URL: [www.marinepals.com](http://www.marinepals.com).
- Click on "Experience Demo".
- Fill your contact details.
- Select the product and submit the form.  
Please use the system and send your feedback/  
queries to us.
